

Healthy Homes Stronger Communities

The Residential Indoor Air Program provides eligible households in New Haven and East Haven with the Alen BreatheSmart 35i and an Advanced (Fresh) filter — at no cost to residents.

A Simple Step Toward Cleaner Indoor Air

Eligible residents receive one Alen BreatheSmart 35i air purifier with an upgraded Advanced (Fresh) filter — designed to help capture airborne particles and reduce common household odors, chemicals and VOCs. Nothing to install: unbox it, plug it in and choose a room.

INCLUDED IN PHASE II

The Advanced (Fresh) filter

Every Phase II unit includes one Advanced (Fresh) filter: true H13 HEPA media to capture fine particles, plus an activated carbon layer for added protection against smoke, odors, chemicals and VOCs. Replace about once a year — the purifier tells you when.

H13 HEPA

Medical-grade filtration that captures 99.9% of airborne particles down to 0.1 microns.

23–42 dB

From a whisper on its lowest setting to a quiet conversation on its highest.

Up to 12 months

Filter life with continuous use, so upkeep is about once a year.

What participation includes

- ✓ **No cost.** The purifier, the Advanced (Fresh) filter and shipping are covered.
- ✓ **No obligation.** Applying commits you to no future fees or requirements.
- ✓ **Lifetime warranty.** Register with Alen and replace the filter with a genuine Alen filter every 12 months.

How to apply

- 1 **Check your mail.** Every property inside the program boundary receives a letter from the Airport.
- 2 **Apply** by mail or online at hvnsound.com. Renters may apply with the owner's written consent.
- 3 **Receive your purifier.** Once your address is verified, it ships from Alen directly to your door.
